

Picture Gallery 2006 from <http://www.ifjungo.ch>

January: Reopening of Kulm Hotel and the renovated astronomical observatory Gornergrat South.

February: Prof. Luc Delbouille, working at Jungfrauoch in February 2006, and celebrating on site his 50 years of research work at Jungfrauoch in the “Migeotte Group” of the Université de Liège (Belgium).

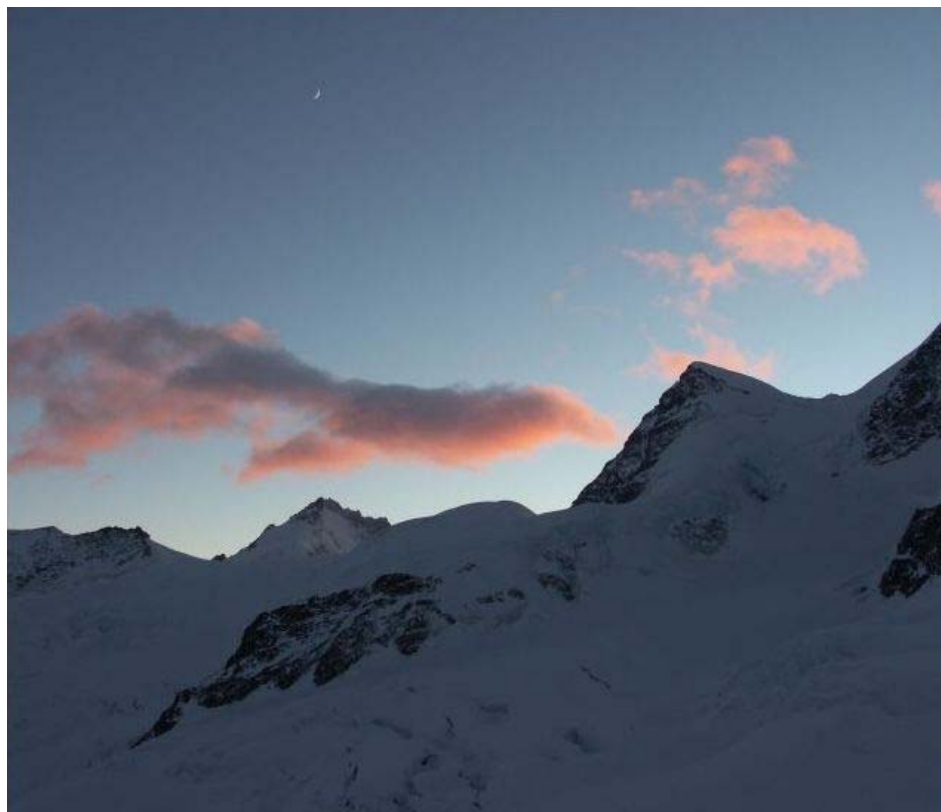

March: CLOUD and Aerosol Characterisation Experiment, CLACE 5, with more than 40 researchers from seven institutions. These outside installations have to withstand the harsh weather conditions at Jungfrauoch.

April: Evening at Jungfrauoch.

May: The spark chamber on exhibit at Jungfrauoch, photographed by Monika Loeffel, freelance artist.

June: Evening view in May from Jungfrauoch.

July: 24 hour filter samples of PM10 (particulate matter < 10 micrometer) collected with the high-volume sampler at Jungfrauoch during a strong Sahara dust event (on 20 June 2006; filter 076171, on the right; 62.3 microgram per m³) and during usual summer conditions (on 04 June 2006; filter 076155 on the left; 2.3 microgram per m³).

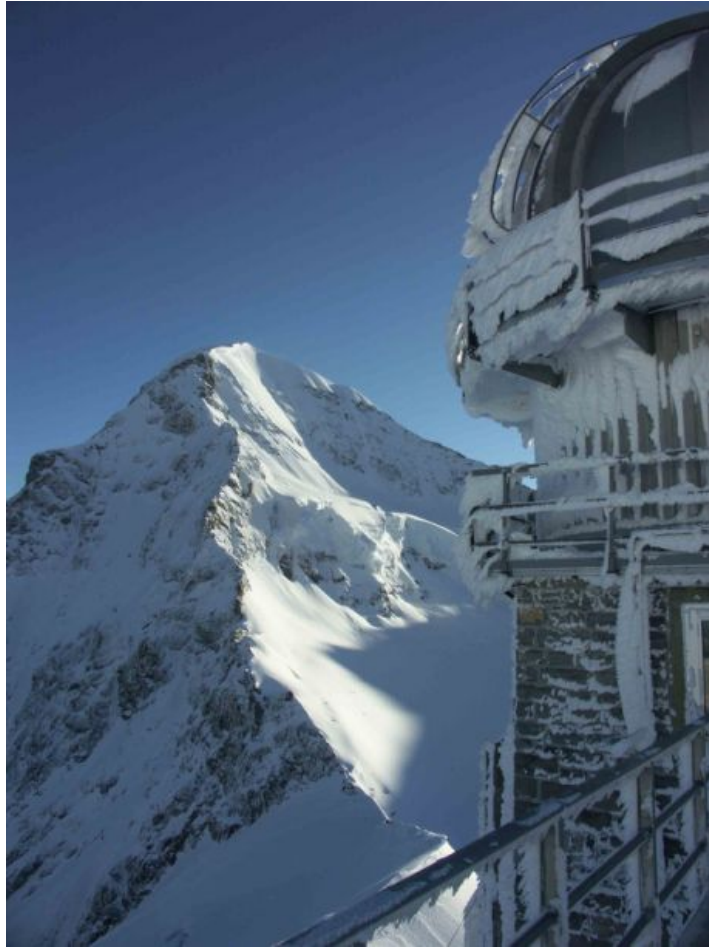

August: An extraordinary full moon night as seen from Jungfrauoch

September: Research at Jungfrauoch – Top of Science. A snapshot from the scientific conference in celebration of the 75th anniversary of the Research Station Jungfrauoch, held in Interlaken, September 11-14, 2006.

October:
New meteorology
installations

November: View of the Mönch from the Sphinx.

December: Hoarfrost at Jungfraujoch.
